Resumo

Supporting Account Manager in maintaining finance guidelines (budgets/open book account) in line with the SLA and I also develop data products using Machine Learning techniques to solve business problems for companies in the private sector. My main objective is to work as a Data Scientist, developing data products, either through Analytics or Machine Learning techniques or Statistics to solve business problems for companies.

As a Data Scientist, my latest work was the development of a propensity score to sort a list of customers and prioritize commercial prioritize calls to commercial time, using Learning to Rank algorithms and Rank algorithms and Python programming language. According to estimates, this solution would bring a monthly increase of 40% in the company's revenues. A solution was developed with public data and demonstrated in a personal project portfolio that you can check in the projects section further down in this profile. below in this profile.

While working as an assistant manager, I created an evaluation method to increase efficiency and reduce the time spent by employees in the area of cleaning in the execution of the work, with a face-to-face and monthly evaluation, the result of the application of the method, brought an increase in efficiency of 40% for each employee.

As a professional, I prioritize fast delivery and quality solutions with data. Being practical in solving business problems, but without neglecting the theoretical basis.

At this point in my career, I feel confident to work as a Data Scientist in any company, generating value by applying my knowledge in Python, Statistics, Machine Learning, Storytelling and Software development tools, to build data solutions that solve company problems. My experience contributes to thinking of solutions outside the box.

Analytical Tools: SQL, Python.

Development Tools: Git, GitHub, Lean Analytics, Airflow.

Database: MySQL, Postgres, SQL Server, Snowflake.

Machine Learning: Classification, Regression, Clustering, Time Series and

Reinforcement Learning.

Experiência

Comunidade DS

Data Scientist

setembro de 2022 - Present (2 anos 7 meses)

São Paulo, Brasil

Main results:

1. Construction of a points program for the company, grouping relevant customers through Clustering algorithms, to increase the company's revenue. The expected result is a 10% increase in the number of purchases in the most relevant group.
2. Development of Ranking algorithms, to calculate the purchase propensity of a list of potential customers. Algorithm with 75% accuracy on the Top50 and the expected result of a 15% increase in the company's monthly revenue.
3. Building a Machine Learning algorithm to predict sales 6 weeks in advance in a chain of pharmacies in Europe. The trained Regression algorithm has

90% MAPE and the result of the solution is R\$ 5 million in incremental monthly sales. month.

4. Creation of interactive maps using Python language, to indicate opportunities to buy properties with a market value below the average price of the region. the average price of the region.

Tools: Python, Machine Learning, Git, AWS, SQLite, PostgreSQL and SQL.

Andron Facilities Management

4 anos 3 meses

Supervisor

janeiro de 2021 - Present (4 anos 3 meses)

Londres, Inglaterra, Reino Unido

- Supervised cleaning team of 10 and monitored adherence to strict company standards.
- Completed cleaning checks in floors areas.
- Led investigations into system issues and planned fixes to minimize downtime and control costs.
- Elevated customer satisfaction ratings by resolving issues and fostering speedy resolution.
- System management to ensure the fulfilment of the project objectives, specifications, and requirements of the contract.
- Control of hours worked
- Entries in the hours worked projection system to make payments
- Employee vacation management
- Purchaser of material for workers
- Management Assistant

Assistant Manager

janeiro de 2022 - Present (3 anos 3 meses)

Londres, Inglaterra, Reino Unido

- To support both the account manager and team leaders within their roles (wages, ordering of stock, equipment management, permits, training and document control).
- Inspired and motivated 20 staff members to achieve KPIs.
- Reviewed and verified weekly and monthly contract invoices, enabling timely, accurate payment processing.
- Helped less experienced staff manage daily assignments.
- Used forecasted and current financial data to set clear budget targets.

- Prepared reports and correspondence on complex resource management issues.
- Facilitated maintenance and repair of office and equipment.
- Developed training programmes to boost staff capabilities.
- To carry out regular audits using Principle's auditing system.
- Knowledge of Health and Safety regulations and application to the staff so that they are strictly followed, always, including reports of Near Misses and Incidents/Accidents via the Internet (QUOODA) and PCS systems.
- Assisting in payroll, releases of absences and overtime in the Templa integrated system.
- knowledge in COSHH assessment and application for staff.

F&W Networks

Cable and Fibre Network Technician

maio de 2019 - dezembro de 2020 (1 ano 8 meses)

Londres e Região, Reino Unido

- Optical fiber fusion work
- installation of CCTV cameras with fiber optics installed and maintained telecommunication and other data systems at customers' premises, consistently acting with professionalism.
- Installed fixed and wireless network equipment and set up new telecommunications services within a minute timeframe.
- Completed installation jobs to quality standards within required timeframes.
- Installed and repaired telecommunications and data transmission equipment.
- Integrated firmware into devices, network components, and embedded systems.
- Inspected fiber optics and other data cables for damage.
- Kept written records of repairs and maintenance work for reliable recordkeeping.

Caixa Econômica Federal

Senior Financial Planning Analyst

janeiro de 2016 - janeiro de 2019 (3 anos 1 mês)

Louveira

- Activities in the Financial Administrative area, involving accounts payable and receivable, credit and collection and financial control of the company.
- Experience in planning the entire financial routine, such as receipts and payments made and generating analysis of billing information.

- Accountability at the end of each day. Support to commercial and corporate areas, prospecting for new customers, checking contracts, opening accounts, financing, and loans.
- Experience in the entire financial area from the performance analysis of financial operations, the definition of control spreadsheets, management reports, cash flow control, bank reconciliation.

Autocam Corporation

Supervisor de Compras

junho de 2010 - novembro de 2015 (5 anos 6 meses)

Campinas e Região, Brasil

Summary of Qualifications

- Extensive experience in the Purchasing area, involving the acquisition of services, products, raw materials and equipment for large industries, through selective processes of suppliers and competitions.
- Experience in carrying out studies and visits to suppliers, aiming at the development of alternative sources of supply, as well as the evaluation of the technical capacity of the suppliers already registered.
- Monitoring the entire purchasing process, being responsible for planning, drafting contracts, cost analysis, quality and delivery times, payment control and inventory management.
- Supervision of teams, carrying out hiring, training and guidance of employees in solving problems.
- Cost reduction by 40%, through the development of new suppliers and carrying out major negotiations.
- Contract analysis, supplier evaluation and qualification

Autocam do Brasil Usinagem LTDA

Comprador

junho de 2010 - março de 2014 (3 anos 10 meses)

- Atuação no contato com fornecedores, negociando preços, descontos e condições de pagamento, conseguindo uma redução dos custos em 40%, através do desenvolvimento de novos fornecedores, além de realizar a aprovação de acordo com o limite estabelecido pelas normas internas da empresa, entrada e lançamento de notas fiscais em sistema integrado (MFG Pro), verificando todas as operações fiscais, cadastramento de radar, Siscomex .
- Responsável pelo recebimento de requisições de materiais, locações e serviços, acompanhamento do fluxo de entrega dos materiais e elaboração de relatórios para avaliação do desempenho do setor (curva ABC, KPI's).

- Analista de contratos, verificação de todo o processo dando ênfase no que foi negociado.

Formação acadêmica

Regent College London

Bachelor's degree, Tecnologia da Informação · (junho de 2021 - dezembro de 2022)

Coursera

Suporte em TI do Google · (maio de 2022 - agosto de 2022)

Grupo IBMEC – Metrocamp Veris IBTA

Bachelor's degree, Finance & Accounting · (2011 - 2015)

- Colégio Técnico de Campinas – Cotuca/Unicamp

Tecnico industrial, Torneiro Mecanico · (2005 - 2006)

Escola Salesiana Sao Jose

Desenhista Projetista, Desenho Industrial · (2003 - 2005)
